

## Students Message

### Mechanical Department

#### Bharat Matta (2003-2007)

I **Bharat Matta** completed Bachelor degree in Mechanical Engineering from JECRC in the year 2007. I did it in Honours. I never thought I will be achieving that with so many activities during those 4 years. I was also the founder of Yuva, a non-profit foundation. You can learn more about Yuva at [www.planetyuva.com](http://www.planetyuva.com). I was also selected during college placement at **Reliance communication** as Graduate Engineer. However, that didn't work out as my expectation for myself was a bit high towards the vision of life. I had already prepared for GRE during my college days.

Yuva, Mechanical Engineering, GRE and College life, was a passion for me. I never had a moment where I felt like it's a burden on me. Even during university, I enjoyed studying with hostel roommates. I also stayed in the hostel for 4 years. Indeed, even in hostel leadership worked. We improved food menu. It was all decided by every member of the 1<sup>st</sup> year, 2<sup>nd</sup> year, 3<sup>rd</sup> year and 4<sup>th</sup> year. We did celebrate all the functions. I had very good bonding with my batch mates, teachers and all juniors/seniors. My seniors shaped me a lot. They had their own charm I learned a lot from them. Everyone motivated me to publish my own book name as "Journey of Life" in 2005. It was a huge launch. Sometime, I always think that without two special professors I wouldn't have achieved all this and they are MP Singh Sir and Manish Jain Sir. Also, I had big support from Director Sir. Sometime, I had long conversations with him regarding Yuva. He has always uplifted me. JECRC is a perfect mix where one can groom himself/herself in all way.

Then, I moved to Detroit for my Master Degree in Industrial engineering at Detroit in 2008. I don't know why I loved Industrial Engineering but it was awesome. I had always desired from inside to learn new things. US Style is different from India. Every week, they teach you, you give exam, present case study, solve problem and presentation. Their way of teaching is so intense that you have to focus every week and get it done. Every week decides your final grade. I almost completed by 75% of degree in first 8 months. Then I moved to Chicago for my Internship at Motorola. In meantime, there was one rule in my university, where you have to pay 9 credit fee for 1 year and that total to almost \$10,000. This doesn't count in your degree program. I wasn't aware of it and this was extra. More than that I felt like, this is wrong. I am not using any university resource then why should I pay the fee. I started asking questions to my adviser, dean and head of college of engineering. It further went till university president. I also created awareness among student. Slowly it turned into a

movement and finally university change the law in favour of students. Now student needs to pay 3 credit fee and that too count in a degree program.

After that, I focused on my internship. During my internship, I was certified as Six Sigma Black Belt from ASQ. Later I joined Motorola as full time. The black belt was the biggest achievement for me as I was too young for that.

I worked with **Motorola** for 3 years and then part of Motorola was acquired by **Intel**. So now, I am **Intel** employee with 7+ Years of experience. Currently, I am located in Dallas. I am working as Customer Experience Process Engineer for Enterprise Customer. It's a way you understand customer problem and figure out the solution. Industrial Engineering, will teach you so many aspects of business. My technical experience working with Mobile & Chip-set Development is also an add-on. One should be always open for learning.

Apart from current job, I am working on new project name as "Ask us Local". It's an initiative where I'm contributing towards American economy to teach local business how they can be smart. You can learn more on web "[www.askuslocal.com](http://www.askuslocal.com)".

#### **Abhishek N Joshi (2003-2007)**

It was the golden period of my life I have learnt a lot from my faculties and always feel proud to be a part of JECRC. With so many memories to cherish and knowledge to explore the world, JECRC is a complete package.

After passing the college I got placed at **Bosch Limited, Jaipur, Rajasthan** as an Assistant Manager, Quality. It was indeed a new experience of learning I have performed various task such as Process and Product Audit department head handling PPAP, Process FMEA and control plan based audits, TS audits and Customer audits, resolution of chronic problems of customer using Quality Tools of SHAININ to identify root cause, design improvements and product reliability and performance improvements by drill deep analysis and choosing best alternative, lead senior management review meetings with Customers.

Then I was moved to **Bosch Limited, Gurgaon, Haryana** in 2013 as a Field Service Competency Leader–North, where I was Responsible for Northern India service issues related to 11 product portfolios of Bosch. In September 2014 I joined **Ingersoll Rand India Limited, Ahmedabad, Gujarat** as a Quality Manager and still working there.

It's been an amazing journey from JECRC to a corporate world, I must say the position at which I'm today is only because of the faculties and the environment at JECRC which has

nurtured us in such a beautiful way that I'm always ready to face the challenges coming on my way.

**Akshat Yadav (2004-2008)**

JECRC College is not just a place where you learn answers to a lot of life's questions but also a phase which will make you question a lot of life's answers.....

I have completed my B.tech in 2008 from Mechanical Engineering with all the dreams, knowledge and experience of the wonderful and the most amazing four years of my life, I moved to Ranchi to pursue my dreams and to take the knowledge to another level in 2009 I joined Xavier Institute of Social Service for MBA in HR from where I got selected in a Public Sector Company Hindustan Copper Limited as a Management Trainee (Human Resource) and was posted in Rajasthan. In

August 2015 I was transferred to Hindustan Copper Limited at Gujarat as posted as unit HR Head and till then I'm continuing at this unit. JECRC has played a vital role in my career development the Institute and Faculties has nurtured me so well that I always feel proud to be a part of JECRC

**Saurabh Jain (2004-2008)**

Good wishes to all..... I have completed my graduation in 2008. Initially I joined in I.T branch but during first year found my interest in Mechanical and shifted to it after completing first year. Those four years (2004-2008) were undoubtedly the best years of my life. Great teachers, friends & memories are assets that I gained in that period which have made me a rich person, not by virtue of money but by emotions and relationships. M.P.Singh Sir, Manish Jain Sir and Kuldeep sir are people whom I owe a lot in my life. I joined Reliance Industries limited as a Maintenance Engineer in 2008 and had worked there till 2010, then went on for pursuing my MBA from Delhi Technological University (Popularly known as Delhi College of Engineering). Since 2012, I am working with Tata Hitachi

Construction Machinery Company Private limited as Sr. Manager-Sales & Marketing in Jaipur. Sitting in my office while writing this note pictures of College campus, Yadav ji ki canteen, Mechanical labs & old friends are floating in my mind, I am feeling nostalgic. I am having a feeling of Gratitude towards the Institute for allowing me to be a part of it.

### **Vipul Saini (2006-2010)**

First of all I would like to thank Arpit Sir, you and all the JECRC family for considering me capable enough for such a prestigious award. My name is Vipul Saini. I'm from Jaipur Rajasthan I did my B Tech. from JECRC (2010 Batch Mechanical) Presently I'm posted as Assistant Commandant (DySP) at Bangalore Airport and working for MHA. Before this I was posted at Vikram Sarabhai Space Centre, Trivandrum-Department of Space. During my college days I got a chance to represent JECRC in Bodybuilding and Power lifting at National Level and won awards at BOSM (BITS Open Sports Meet) MST (MNIT Sports Meet) and various other events. The most interesting thing about studying in JECRC and I think everyone must

agree is that it provides you freedom to express yourself unlike other colleges where you don't get such liberty. I got Campus placed in Surya Roshni Ltd in 2010. That was a year of recession and getting campus placed was a privilege in itself. I was fortunate though that my joining was the earliest in our batch. There I worked as a Production Engineer and was posted at Anjar near Bhuj (Gujarat). There I felt a need to broaden my horizon and become a Civil Servant (Since my Elder brother is already RAS). So I resigned from my job in 2011 and went Delhi to prepare for Civil Services after working for a year. I prepared from Delhi for 2 yrs. and got selected through UPSC in 2013. Got trained in 2014 from Police Academy in Hyderabad. Thereafter I did Commando Course twice, once Short Commando and second time Special Task Force Commando, Basic Fire Safety Course, Special Tactics Course and various other courses in such a short span of 4 yrs. Of my major Security Assignments till date I was in Madras High Court during the time of agitation of Lawyers, part of Defence Expo (GOA), Security Expo (Delhi), Aero Show (Bangalore), etc.

### **Parth Mishra (2008-2012)**

With due respect and honor, I extend my deepest gratitude to you for providing such a solid foundation and creative environment at JECRC which helped me to pursue my Bachelors in Mechanical Engineering with HONOURS alongside placements in two leading companies i.e. TCS & BGR Energy in year 2012. It gives me immense pleasure to share the news that after successfully completing Bachelors at JECRC and thereafter working as a Commissioning Engineer at BGR Energy, I have been selected for the MSc. Renewable Energy Engineering & Management program at UNIVERSITY OF FREIBURG, which is one

of the 100th best in the world, 3rd best in Germany and having one of the world's best MSc

## Renewable Energy program

### **Kartika Malpani (2006-2010)**

I started with my academic journey at JECRC where I meritoriously graduated to be the only girl Mechanical Engineer of class in 2010. Soon after I joined HONDA, a prime automotive company in the world, working for their Research & Development division where I undertook myriads of projects in the field of automotive research, product innovation, sustainable technology & testing collaborating with teams in Thailand & Japan. I was fortunate to represent India at the Honda NHC World Convention in 2011 in Vietnam.

In the midst of my stint at Honda, I tuned into my passion for Creativity & Design Thinking and got selected in India's first & foremost design college, National Institute of Design to pursue my Masters in Strategic Design Management. This course resided at the intersection where Design learning honed at NID blends with strategic planning & management skill instilled at IIM Ahmadabad creating future leaders & business transformer.

In 2014 after completing my course, I worked for many leading product design houses and corporate such as Bosch and Info edge. Also worked as a Lead Designer and Strategist at naukri.com. India's top job portal, developing high impact websites & mobile apps. My expertise lie in the field of User Experience Design, Brand Development, Trend forecasting, Product Innovation & Design Management.

I extend my deepest gratitude to Arpit Sir & all the faculties of Mechanical Department for providing such a solid foundation and creative environment at JECRC. All the Best!!!!!!!!!!!!

### **Mrtiyunjay Mishra (RAS) (2006-2010)**

I started with my academic journey at JECRC where I was a Mechanical Engineer of class in 2006-2010 Batch. During the preparation phase of life I was fully motivated & focussed on my target of getting into Job I always dreamt. It was not that easy as the journey to be an RAS was nothing less than a roller coaster ride. But one thing I would like to say that everyone should focus on the goals and not on the path to that goal.

I have fought for RAS got selected time in 2016. Through all my journey I was always thankful to JECRC for giving me such good environment &

Education. I'll always be thankful to M.P Singh Sir for keeping me motivated & helping me out whenever I needed.

I extend my deepest gratitude to Arpit Sir & all the faculties of Mechanical Department for providing such a solid foundation and creative environment at JECRC. All the Very Best.

### **Ghanshyam Pilonia (2008-2012)**

Dear all JECRCians,

I was a Mechanical aspirant of 2008-2012 batch in this wonderful college JECRC. My College days are unforgettable and in fact those days are the most happiest & fruitful days in my life. I proudly feel that I cherished every moments of my college. Being a “JECRCian” make me feel proud. My experience in JeECRC was just amazing. I got infinite love & lessons from my teachers especially from Manish Jain Sir, Kuldeep Sir, & Ashish Nagpal Sir, here teachers made me do “Work Hard” for the way to success. Miss those days of JECRC. Just want to thank to the wonderful faculty of JECRC....I am proud to be a Jecrcian. After completion of my college degree I prepared for Gate and secured AIR 21 in Gate 2013 examination and got selected in PSUs like IOCL, BPCL, HPCL, NTPC etc. Later after consulting with my seniors and teachers I joined in IOCL as an Operations Officer. Currently I am posted at indene Bottling Plant, Jhunjhunu as a Safety Officer. I wish to inform you all once again that through the proper guidance and hard work anyone can achieve much higher milestones for which you dreams like me. Wish you all the best.

### **Mahipal Singh Kachhava (2005-2009)**

Dear all JECRCians,

I was a Mechanical aspirant of 2005-2009 batch in this wonderful college JECRC. My College days are unforgettable and in fact those days are the most happiest & fruitful days in my life. I proudly feel that I cherished every moments of my college. Being a “JECRCian” make me feel proud. After completion of my college degree I got selected in Infosys & HZL Vedanta where I opted for HZL & since then I'm working with HZL. I joined as a trainee engineer & now I'm working as a Deputy Manager all of this was possible because of deepest knowledge & well guidance I receive from my faculties at JECRC My experience in JECRC was just amazing. I got infinite love & lessons from my teachers here they told “Work Hard” is the only way to

success. Miss those days of JECRC. Just want to thank to the wonderful faculty of JECRC....I am proud to be a JECRCian. At the very outset I would like to express my heartiest thanks to JECRC for making me who I'm today. Wish you all the best.

### **Computer Science Department**

#### **Piyush Bohra (2017-2021)**

I consider my time in college as my most valuable experience. JECRC gave me a platform to sharpen my skills in my field of choice i.e. Computer Science & Engineering and helped me to secure pre-placement offer from 3 MNC's along with good academic record. In addition to learning practical skills, being in college has also taught me about the importance of social work, activities like blood donation and working towards girl child are the prime examples. Apart from it college faculties are very supportive and experienced they are truly the pillars to student's career growth. Hackathon's & Renaissance-the college fest, would surely going to be the best part of your college life experience and memories that you will cherish forever .Yes!! It is true that "College inspires you to think differently, it's like no other time in your life. "Thank you JECRC.

#### **Harshit Bansal (2017-2021)**

Well! I Harshit Bansal from Computer Science & Engineering there is no doubt that JECRC is a prestigious institute. It not only helps to grab better opportunities but also enhances academic and interpersonal skills. The competitive environment helps me grow more. And the best thing is that there are many activities held around the year. They do not bound by the curriculum but teach you new technologies as well. I also get the opportunity to start a coding community "CodeForVision". The Faculty members are the real mentors; they guide and show the right direction.

**Akshit Ostwal (2017-2021)**

My journey at JECRC College in Computer Science and Engineering has been amazing from academics to winning over 9 Hackathon's and starting my own start-up and getting it incubated in RTBI, Faculties and management at JECRC have helped me a lot.

From the classroom environment to the Spiritual research centre and Renaissance, studying here have not only resulted in academic growth but also spiritual, social and professional growth too.

Special classes for placement i.e. Campus Recruitment Training by JECRC have helped me a lot in brushing up the concepts, solving aptitude questions, cracking GD and personal interviews of many companies. Also dozens of companies come for campus placement every year which result in setting whopping records of on-campus placement here in JECRC.

**Ishaan Hemrajani (2017-2021)**

My four years at JECRC were great and a memory to cherish for lifetime. It was full of learning and grooming oneself. I have established my leadership, time management and team skills and have also been able to advance these skills to the whole new augment level. It gave me an opportunity to meet different kind of people and learned many things. The faculties here make the college what it is today. With an attitude of being ever ready to help and motivate students whenever required is highly appreciated.

I am thankful to all the faculties, mentors and entire Computer Science and Engineering department as well as placement cell. Overall it was a great experience and lifetime memory at JECRC.

## ECE Department

### **Kushagra Sharma (2015-19)**

"JECRC is not just a college but an emotion for me as college sets an epitome of all-round development in the student. I completed my graduation in electronics and communication stream from Jecrc in 2019. I got placed in Byju's even before completing my final semester through campus placement and now Business Manager in Data Ingenious Global Limited. To my surprise, being a Jecrcian is considered a status symbol as people drew the impression that if a student is from Jecrc he must be competent enough for the required skillset. I am currently working as a business manager in Data ingenious global Ltd and when I interview

fresher's for various roles, Students of Jecrc stand apart clearly. Jecrc is not only well known in Rajasthan but Nationwide and this recognition are because they invest in student's skills and enable them to unleash their best version. The way the entire Jecrc team specially ECE department works to explore students' potential and enable them to grow personally and professionally, makes the organization best suited. Yes, definitely a proud Jecrcian, not only for how they have helped me but for the fact that they believe in delivering quality education, and unlike other organizations, the administrators are academicians and not businessmen."

## Civil Department

### **Radhika Bhardwaj (2014-2018)**

I believe that choosing JECRC for my studies was a lifetime decision. The teaching learning process is friendly besides being efficient. I am grateful to my faculty and management for providing me with the required industrial exposure which is helpful for me at my workplace. The proper nurturing at JECRC has helped me a lot professionally.

### **Kalpita Meena (2014-2018)**

I am fortunate enough to be a JECRC Alumni as I had ample opportunities at the college for my academic excellence as well as personality grooming. JECRC is one place where dream meets reality. The moments captured at JECRC are the most precious for

me. I thank the faculty and management for giving us a life changing experience.

**Nikhil Maheswari (2014-2018)**

The college days at JECRC were filled with joy and enthusiasm. This was due to the dedicated college management and faculty of CE department. The practical experience gained through industrial tours and visits helped us to evolve as a civil engineer. I feel privileged to be a JECRC Alumni.

**Anshul Kumar Gupta (2014-2018)**

The availability of right opportunity at right time is very important. I think getting admitted to JECRC was an opportunity met at the right time for me. I dedicate my professional achievements to the honest efforts of the JECRC family. I believe it is an organization which believes in all round development of its students. I thank CE department faculty for their commendable efforts in making me an efficient civil engineer.

**Information Technology Department**

Department of Information Technology  
JECRC, Jaipur

**#memories @2012 batch**

The Edifier  
Department of Information Technology  
JECRC, Jaipur

*The will to win, the desire to succeed, the urge to reach your full potential... these are the keys that will unlock the door to personal excellence" well defines another shining star of IT, Shreya Agrawal, 2012 passout. She is currently working as an Associate Software Engineer at Accenture Services pvt ltd, Mumbai where she was placed through e-litmus scoring 96 percentile. She has a work experience as a Business Analyst at Rebus Code. She has also written two international papers and has worked as a member in various research papers. Not only this, she has brought laurels to the department by being the college topper in 8th semester and achieving the title of Miss Aada in Renaissance-2012.*

*It is a great pleasure to have you as a part of our department and we wish you shine all the paths you walk onto.*

Shreya Agrawal  
2008-2012

**Forever's  
week 2**

Moving on to our next achiever we have **Ms. Surbhi Gupta**, 2013 batch passout who believes that "The starting point of all achievement is DESIRE". She had got placed on campus in TCS and is currently working in **IBM India Pvt. Ltd.** She got internship from NCR Corporation, New Delhi and had also completed many projects. She was one of the writers for Renaissance'12 blog.

-SURBHI GUPTA  
Information Technology  
2009-2013

**“Knowledge is being aware of what you can do. Wisdom is knowing when not to do it.” These lines perfectly defines our next achiever Ms.Ritu Gupta , 2012 batch passout. She was placed in TCS. “Opportunities don't happen, you create them.” Keeping these lines in view, she presented many research papers in both national and international conferences . She was the branch topper with 80.6%. She is in touch with technologies like UI-flex, Architecture-Spring MVC and Data Mobile Agile. She is certified in Microsoft Digital Literacy Test and was honoured with many medals and certificates.**

**- RITU GUPTA**  
Information Technology  
2008-2012

**“Take up one idea. Make that one idea your life-think of it, dream of it, lives on that idea. Let the brain, muscles, nerves, every part of your body, be full of that idea, and just leave every other idea alone. This is the way to success.” These lines solely justifies our next achiever Mr. Dheerendra Khandelwal, 2013 batch passout. He is currently working in CENTRAL BANK OF INDIA as an Assistant Manager (scale-1 officer). He brought glory and fame to the department by being the youngest in 2014 Probationary Officers batch of CENTRAL BANK OF INDIA.**

**- DHEERENDRA KHANDELWAL**  
Information Technology  
2009-2013

Our next achiever Mr. Aakash Hemani, 2013 batch passout wholeheartedly followed his career objective "To work in challenging milieu that would facilitate maximum utilization of skills". Now, he is sharing his technical skills and time with Accenture Services Private Limited at the designation of SAP SD consultant. His technical skills include languages C, C++, Java, SAP SD along with MySQL and SQLite. He attended workshops conducted by Microsoft on sensational technical topics and was certified by Microsoft Digital Literacy.

- AAKASH HEMANI  
Information Technology  
2009-2013

“Success consists of going from failure to failure without loss of enthusiasm” this follows one of the achiever of the department, **Mr. Keshav Khandelwal**, 2012 batch passout. He is currently pursuing for Master’s Degree in Computer Science from **California State University**. Not only this, he is Redhat Certified Engineer (RHCE) and also worked on AWS Services like Dynamo DB, SQS and SNS. His strength lies in the “Half filled glass ”attitude. He has a strong grip on networking and has good knowledge about hacking and penetration testing Back Track tools.

-KESHAV KHANDELWAL  
Information Technology  
2008-2012

"There is nothing capricious in nature, and the implanting of a desire indicates that its gratification is in constitution of the creature that feels it" these organized group of words are brought into reality by our first alumni of Achievers' Week 3, Mr. Pradeep Choudhary. Currently, pursuing MBA from IIM, Raipur. He also shared his skills with TCS for 1.5 years and also bagged "On the Spot" Award for delivering Quality Product in time. He acted as Planner in Rajasthan Fashion Week 2012, Founder Member in iXpo 2012, and was also a member of Core Team in Renaissance'12.

- PRADEEP CHOUDHARY

2008-2012

## The Edifier

Let's innovate

### Achievers of IT department

Vineeta Jain  
2009-2013

Continuing with the "Success Saga" is our next achiever **Vineeta Jain**, a 2013 pass-out.

She not only got placed in **TCS** but also cracked **GATE 2013** with **99.5 percentile** and **AIR 1126**. She is pursuing **M.Tech** from **National Institute of Technology (NIT), Bhopal** in **Information Security**. She also got an **NIIT Certification** for securing a very good rank among 65000 students in **General Aptitude Test**.

We feel proud to have you as our alumni and wish you luck for your future endeavors.

*congratulations*

*"Whatever the mind of a man can conceive and believe, it can be achieved". This statement has been justified by our next achiever, Neeraj Singh, 2011 batch pass out, who believes that "some people dream of great accomplishments, while others stay awake and do them". Despite of no campus placement his confidence never laid down. He had been selected as an assistant in Jharkhand Secretariat later. Currently, he is working in MBGB (PNB) bank as a scale-1 officer, district branch Arwal, Patna. He has been a keen learner and always chosen a different path to fulfill his dreams.*

*We extend our best wishes for his future*

Neeraj Singh

**Achievers**  
week 2

The Edifier  
Department of Information Technology  
JECRC, Jaipur

The next achiever who will join our Achiever's Week is Ravi Sati, 2010 batch pass out, who believes that "Try not to become a man of success but rather to become a man of values". He was placed in both Tata Consultancy Services and Infosys but had chosen Tata Consultancy Services and has 3 years of experience as a system engineer in the same. Currently, he is working at iGATE Global Solutions Limited as Senior System Engineer-IMS. He holds good experience in Java (Swings and JDBC), PL/SQL and has worked on the project "Risk Management System" for Global Investment Bank. He has also worked on Wintel, Citrix and ticketing tools like JIRA, ARSC - GCM and DB Symphony. Not only this, he also completed his diploma from Birla Institute of Professional Studies (Rajasthan).  
We wish him good luck for his bright future.
